# ADVANTAGES AB/S/DR

- Top or rear outlet of gases
- System of two deflectors – steel and Acumotte - which increases the exhaust path
- Triple system of airing the combustion chamber: primary and secondary air and the air curtain (system of clean glass)
- Combustion chamber is lined with ceramic Acumotte 25mm thick
- Air regulator
- Built-in air intake connector fi 100 mm Regulation of primary air intake under the grate
- Chamber under the furnace is equipped with “push to open” mechanism – opening by pressure
- Moving, rotating cast iron grate

# ADVANTAGES KOZA AB/S/N/DR

- Modern cylindrical shape
- Top or rear flue gases exits (using a rear exit it is required to buy also a blind of a top plate)
- Material: combustion chamber, the stove body, top plate and door made of steel
- A system of two baffles that extends the flue gas path
- The door are equipped with a modern sliding handle (door closing system is an additional option)
- Large glazed door with a semicircular glass
- Combustion chamber is lined with 25 mm thick ceramic Acumotte - Movable and rotary iron grate
- An air regulator
- The chamber underneath the stove is equipped with a mechanism „push to open” opening by pressure
- Built in external air inlet fi 100 mm regulation of primary air intake under the grate
- Triple system of the air supply to the combustion chamber: primary air and secondary air supply and air curtain (clean glass system)

# ADVANTAGES KOZA AB/S/2/KAFEL AND AB/S/2

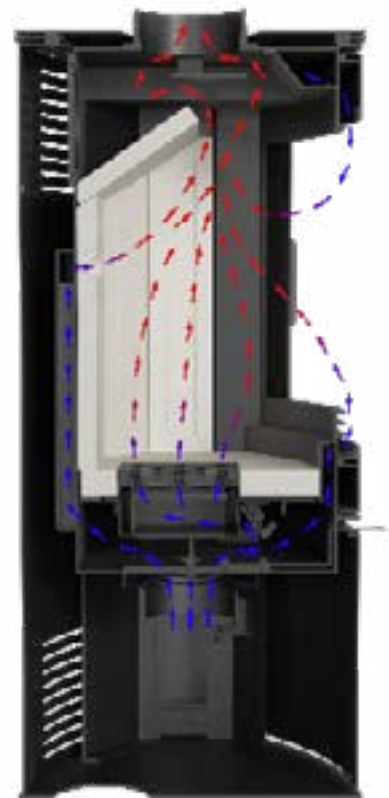

- The air intake system is possible only from the outside: the primary and secondary air plus the air curtain.
- Improved Acumotte. The new formula makes it resistant to any mechanical damage, better accumulates heat and improves combustion performance.
- Improved grate makes the grate mechanism run smoothly while remaining very quiet.
- Recuperation. New design allows to install the insert in passive houses and houses with heat recovery systems.
- The stove Complies with standards of the stringent requirements of BImSchV2
